

Linx TT5 Washdown

THERMAL TRANSFER
OVERPRINTERS

55mm Ribbon width for Basic Batch Code Applications

- For washdown environments
- Clutchless ribbon drive to minimise the risk of ribbon breaks

Tired of additional covers or moving your thermal printer off the factory floor? There's no need for this with the Linx TT5 Washdown. It's ready in seconds!

The Linx TT5 Washdown is IP65 rated to make cleanups and maintenance easier and quicker than before. Ideal for coding onto flexible film packaging, the Linx TT5 Washdown will deliver high resolution print whilst enhancing productivity to increase your profits.

Its Ingress Protection (IP) rating is designed specifically for applications where hygiene standards are important or for particle filled air environments such as food, confectionery and pharmaceutical industries. It retains the same features and benefits as the Linx TT5 thermal transfer overprinter, such as a standard ribbon width (of up to 55mm), and is particularly suited to printing best before dates and batch codes.

For washdown environments

- The simple and quick change of the standard print cassette with the IP cassette means the Linx TT5 Washdown is ready for water jets in seconds.

Increased production line uptime

- The Linx TT5 Washdown use motors rather than clutches to control ribbon tension, minimising the risk of ribbon breaks
- The ribbon cassette design ensures that changing ribbons is quick and simple
- Less maintenance and faster ribbon changeover means increased uptime
- The Linx TT5 Washdown has a 1000m ribbon, resulting in fewer ribbon changes and increased production line efficiency

Easy to use

- Easy to use colour touch screen results in fewer errors and hassle-free operation
- Intuitive graphic user interface allows preview of messages before coding
- An extensive on-board diagnostics package to optimize productivity

Lower cost of ownership

- Bi-directional motors drive both ribbon unwind and re-wind reels, creating more prints per ribbon and leaving only a 0.5mm gap between messages

Exceptional flexibility

- The printer design allows you to switch easily between intermittent and continuous printing modes
- Prevents the need for additional coder investment when production requirements change

Technical Specifications Linx TT5 Washdown

**THERMAL TRANSFER
OVERPRINTERS**

Controllers

Controller

Washdown Printer

Ribbon Cassette

Performance	
Unique solid-state ribbon drive	•
Intermittent motion	•
Continuous motion	•
Printhead	55mm, 300dpi, 12 dots/mm
Print area – intermittent motion mode	53mm (W) x 75mm (L)
Print area – continuous motion mode	53mm (W) x 135mm (L)
Ribbon width	20mm – 55mm
Maximum ribbon length	1000 metres
Print speed - intermittent motion mode	50mm/sec – 800mm/sec
Print speed - continuous motion mode	0mm/sec – 1000mm/sec
Cable length between printer and controller	3 metres
High throughput modes configurable by software	•
Print speeds and throughput are substrate, application and set-up dependant	
General features	
8.4" TFT SVGA (800 x 600) touch screen operator interface	• On-board memory, compact flash and/or expansion card
Full-col. LCD touch panel interface WYSIWYG print preview	• Off-line set up and parameter storage
Clutchless bi-directional ribbon drive	• Multiple operator languages
Simple ribbon webbing	• Job selection and database support as standard
3 levels of password protection	• USB memory stick support
On-board diagnostics	•
Programming & printing facilities	
Image design software	• Ribbon save functionality (3 types)
Full downloadable font support for Windows TrueType (including multiple languages and unicode support)	• Auto best before date calculation and concession management
Fixed, variable and merged text fields	• Multiple graphic formats supported - any size up to maximum print area
Link fields to databases	• Barcodes EAN 8, EAN 13, UPC-A, UPC-E, Code 39, EAN 128, Code 128, ITF, PDF417, Data Matrix QR Model 2, RSS (including 2D composite codes)
Flexible date/time formats	• Text blocks
Formats for shift coding	• Auto incrementing/decrementing text, counters and barcodes
Field orientation 0°, 90°, 180°, 270°	• Basic shape drawing
Mirror image printing, image rotation	• User configurable drop down lists fields
Scaleable text including rotation, mirror and inverse printing	• 512MB message store memory
Real time clock functions	•
Connections/Interfacing	
External inputs (fully software configurable)	3 PNP inputs
External outputs (fully software configurable)	2 relay outputs and 2 PNP +24V outputs
RS232	•
Ethernet	•
USB memory stick support	•
Binary and ASCII comms protocols and Windows drivers	•
Host PC Mode (remote database)	◦
Coder independent network management software	◦
Master/slave unit – link up to four coders to a single controller and user interface	◦
Web server capability – Fully integrate user interface into packaging machinery	◦
ZPL emulation for label design programs	◦
Services	
Air supply	6 Bar, 90psi, uncontaminated, 1.0ml/cycle (max)
Humidity range	85% max
Power supply	90-264V
Operating temperature	5° - 40°C
IP65 environmental protection rating (EN 60529:1991/IEC60529:1989)	*TT5 Washdown Controller
IP55 environmental protection rating (EN 60529:1991/IEC60529:1989)	*TT5 Washdown Printer
Options	
Universal bracket system for integrating coder into packaging machinery	◦
Ribbon range	
Wax / resin ink	•
Resin ink	•
Range of colours available on request	◦
Regulatory approvals	
• MET NRTL • CE mark • FCC • C-Tick	

Key: • standard ◦ option Linx operates a policy of continuous product improvement and reserves the right to change the specification of products without notice.
